"Travel", the second volume in the successful "FamilyLifeStyle" series, is targeted at the new breed of parents who want the best of both worlds: the ability to journey to inspiring destinations in some style within the fabric of the rich and unpredictable melee of family life. The book is divided into four main parts: Plan is about pre-holiday expectations and practicalities; City looks at travelling in the worlds great centers; Adventure is devoted to activities on land, water and beyond; Escape is about parents treating themselves to a new level of indulgence, as well as holidays that will spark your own child's imagination.
