Singapore is a city of concrete and steel, where some of Asia's tallest buildings cast an imposing shadow over the modest quayside shop-houses along the Singapore River. Of all the landscapes and cityscapes of the world, none has seen a more rapid transformation than that of Singapore over the last two decades. Renowned Italian photographer Guido Alberto Rossi unveils the many layers of Singapore through his exploration of the old and the new, the mighty and the humble. Simon Tay, one of

Singapore's most promising young writers and poets, guides the reader through Singapore's urban and rural landscape, providing a vivid counterpoint to the stunning images yielded by the aerial photographs.
