Bhutanese textiles are among the last of the major arts of Asia to gain recognition in the West, and this is the first book to present this outstanding art form in its cultural and historical context. Bhutan's textiles, especially the intricate brocades and complex

supplementary-warp patterns, are unmatched anywhere in the world. This art, with a steadily growing and devoted following in the West and Japan, has become Bhutan's most powerful emblem abroad. This volume, first published in 1994 (now reprinted in 2008) in conjunction with a special exhibition organized by the Peabody Essex Museum of Salem, Massachusetts, covers all aspects of Bhutan's textiles and weaving heritage, from the central role of women - more than 80 percent of Bhutanese women contribute to their household's income by weaving - to fibers, dyes, and looms, to the functioning of beautiful cloth as an item of trade and an indicator of historical change and social identity. This copiously illustrated book reveals the richness, originality, and striking beauty of Bhutanese textiles. Examples come from the Peabody Essex Museum, which holds the largest such collection of any North American museum, and public and private collections in Bhutan, the United States, Canada, and the United Kingdom. The illustrations are supplemented by field photographs and rare archival images.
