Did you know: The chameleon can stretch its tongue out farther than the length of its body?

The gecko cleans its face and even its eyeballs-with its tongue?

The Basilisk iguana can run on the surface of lakes and ponds?

Lizards are extraordinary creatures. They can live almost anywhere-rain forests, hot dry deserts, your own backyard.

Some travel as fast as twenty miles an hour, while others barely creep along. Many can even change color! Whether you're a little bit squeamish or a creepy-crawler fanatic, you're bound to love those AMAZING LIZARDS! With 8 pages of full-color photographs!
