Charlie Galloway has hit bottom-hard. His wife has left him, and the Los Angeles Police Department has suspended him. It is beginning to look as if his life has been permanently shattered.

But when his Filipino housekeeper is savagely murdered, Charlie sees his one last chance for

redemption-if he can find the killer. Somewhere deep in the dark recesses of Galloway's brain is the notion that if he can just solve this one puzzle he can put his life back on track. His desperate search leads him into the heart of a conspiracy that has its genesis in the jungles of the Philippines and snakes its way across the country, through the corridors of power in Washington, D.C., and all the way to Langley, Virginia. It is a conspiracy driven by the calculating opportunism of two men, each of whom wants more power than any one man should have: Senator Byron Truskett, who has a chance for the presidency; and William Laforge, who is Truskett's choice to be the next director of the Central Intelligence Agency.

In the course of his investigation, Galloway stumbles into a morass of political double-dealing and runs the gamut of Washington's sins-adultery, manipulation, and betrayal-all conducted with the obligatory smile. Charlie Galloway slowly comes to realize that he is out of his depth.

Campbell Armstrong has given us the complexities of modern political reality before in such bestselling novels as *Jig* and *Mambo*, but never so compellingly as in *Agents of Darkness*. The shattering climax resonates with an explosive rage deeply rooted in the agony and hopelessness that dominate the life of an honorable man determined to do what he must, regardless of the

personal consequences.
