Dr. Lieberman, a pediatrician, moves to a bucolic Connecticut town one summer when suddenly an outbreak of bizarre "accidents" begin. Some blame the so-called "crazy sickness" on the heat wave. Dr. Lieberman suspects a virus. As an epidemic of a mind-altering DNA virus takes over the town and contagion grows out of control, he uncovers a well-guarded secret in the local pharmaceutical lab. "The pace is fast, concept frightening, the science convincing" -"Daily News"
