The health & prosperity of the emerging global community depend upon global citizenship. But what does it mean to be a global citizen? William Hitt answers this question by applying the principles set forth in Peter Senge's book *The Fifth Discipline* to the problem of global citizenship. In so doing, Hitt not only addresses what it means to be a global citizen, he also provides a practical framework for developing & enhancing the skills that promote cooperation & communication in the emerging global community.
