"On June 4, the body of a young woman surfaced from 300 feet of water in Lake Placid New York.

Because of the depth and the intense cold of the water, the body, which was determined by medical examiners to have been submerged for 20 years, was remarkably well-preserved. Authorities concluded that her death had been violent."

DANCEHALL has become one of the most perennially popular and best-selling novels in recent years,

having been translated and published in many of the major countries of the world.
