isbn:9780764136832

Six full-length Advanced Placement practice Statistics exams are presented in this manual with all questions answered and explained. Equally valuable to prospective

test takers is the author’s 15-chapter topic review, covering virtually everything they will encounter on the actual exam. Topics for review are divided into four general themes: Exploratory Analysis, Planning a Study, Probability, and Statistical Inference. Additional multiple-choice and free-response questions with answers are presented at the end of all 15 chapters. Detailed appendices include exam-taking advice, an AP scoring guide, a guide to basic uses of TI-83/TI-84 calculators, and more.
