This is a brand new addition to the innovative new "Usborne Magnet" series. It contains 10 robust magnetic vehicles found in and around an airport, including planes, trucks helicopters and buggies all to move around the magnetic roads, tracks and runways in each double page scene. The scenes include the departure hall, the runways and getting the plane ready. The magnetic truck pieces can then be 'parked' back into the safe storage areas at the front and back of the book so they don't get lost. It is colourfully illustrated by Gustavo Manvali. It is a perfect gift for little boys.
