Introduction to Politics brings together an expert team of authors to produce the definitive introductory politics textbook. The book's broad coverage includes concepts and ideologies, comparative politics, and international relations, making this an ideal

text for politics modules. Each section is written by an expert in the field. This is an intellectually stimulating, yet accessible, introduction to the subject, which reflects the realities of current global politics. The book avoids focus on Western democracies and assumptions of liberal democratic supremacy, instead illustrating points by using examples from a wide range of countries. Further, it moves beyond a descriptive account of the subject; througout the text, students are introduced to the debates and inherent complexities of the topics covered. Introduction to Politics' analytical approach will challenge students, rather than providing them with one definite line of argument. Introduction to Politics is accompanied by an innovative Online Resource Centre, which includes: For students: Multiple choice questions Expanded case studies from the book with embedded video links to relevant news articles, web video and research Flashcard glossary Further information on key thinkers Web links Political scenario activities Additional case study on the role of the Internet in politics For registered adopters of the text: Summary of each chapter Discussion points based on each chapter PowerPoint slides
