murdered, Chase Randel inherits a share in a half-started development project and the dead man's beautiful ex-wife as a partner. Turning a deserted downtown building into a chic nightspot promises Chase, a wisecracking, lone-wolf broker, a quick half-million dollar profit and instant respectability.

But a lot of people in town have other

plans for the building and aren't afraid to throw around a little muscle. As the action heats up, Chase's partner gets cold feet, and Chase, an ex-alcoholic, wants to reach for the bottle of Jack Daniels on his shelf.

The growing shadow of a bad-luck building and its thirty-year-old secrets threaten not only Chase's big deal but also his life. Chase is caught in the crossfire between big-time developers, a shrill anti-growth lobby, and a clan of offshore Asian money brokers.

His friend, the former owner, believed in the old building, and he paid with his life. Now the same people who pushed Ed Bailey down an elevator shaft want Chase out of the picture
