Too read, or not too read?

.

That is always the question when you open the cover of a new book. Take this one for example. You haven't even made it to an actual chapter and already there's this voice going off inside of you saying things like; "Why should I read this?~ "Where are the cool pictures of neat stuff?." "Who are all of these people, and why did each of em only write one chapter?" Am I gonna get class credit for reading this?" "Why am I talking to myself?." "Would this paper taste

good?" Are the answers to my math homework listed in the back?"

Instead of asking yourself "Why should I read this?" you should be asking "Why shouldn't I?" You've already taken a step in the right direction by reading this far. Don't stop now - you are on a roll.

Keep reading; this is simply TOO cool to put on the shelf.

You see, if this were the kind of book that was written by only one person, you'd be getting only one perspective. But this book is a joint effort of thirteen authors; and if two heads are better than one, imagine how powerful a book can be that contains the perspective of thirteen different people, each of whom captured their best stuff in 2,500 words or less!

Don't get locked-in to reading this from front to back. Each chapter
