Your deeply cherished dreams can come true!

Through their phenomenal bestseller, Wishcraft, Barbara Sher and Annie Gottlieb helped thousands of people discover what they really wanted..., whether it was breaking into a brand-new career, living in a house by the sea, establishing a business of their own, writing a book, or finding a spouse. Now, in TEAMWORKS! they show you how to make wishes come true with a sys-

tem of team support that motivates, strengthens, and gives practical advice and assistance to everyone involved. In Wishcraft, they warned: "Isolation is a dream killer." In TEAMWORKS! you'll find out that the best, the easiest, and the surest way to success is with friends, buddies, and family helping you and cheering you on--every step of the way.

TEAMWORKS! gives you a pragmatic, systematic plan that has already worked for hundreds of Barbara Sher's clients. At its heart is the support group: a group of people who will help you develop plans for any goal, give you information and contacts, phone numbers, addresses, and how-to-do-anything directions. This team will be involved and interested in your progress, applaud you when you've accomplished an objective, and, when you need them, help you find alternative ways to reach your goals. They'll help you stick to your project--and they'll do it all free. Why?

Because you are going to return the favor!

This book provides you with complete instructions on how to star up and sustain the kind of support group you need--from an informal "idea party" targeted to a specific problem, to a Success Team that meets with you and monitors your progress every week, to a lunch-hour "Dream Team" that boosts corporate morale and creativity, to a lifelong personal network that you can activate at the touch of a tele-

phone. It tells you:

- ~ The four reasons why teamwork will succeed when going it alone will fail
- ~ The five basic things that keep most of us from getting what we want
