Red Smith is habit-forming. He is the premier sports journalist in America whose unmistakable style and lucid insight have addicted readers for four decades. This collection of his writing from the last several years was put together by the author himself. Most of it appeared originally in his column in The New York Times but much of it has been revised. Smith covers

the biggest names and events of recent memory--Ali and Frazier, Denny McLain, Munich 1972, Curt Flood, Willie Mays--as well as smaller, unpublicized ones. Strawberries in the Wintertime is a sharply etched portrait of a significant aspect of American life.
