In 1980, Americans gambled, voted for change--and got it. The most ideological President in our nation's history was elected. What have Mr. Reagan and his associates accomplished--and where have they failed? Why is the President willing to gamble so much on "staying the course," and what are the

stakes for the nation--and for his own future?

Here is a balanced, tough-minded highly informed Making of the President after Ronald Reagan's first years in office, written by a distinguished journalist who covered the Reagan and Bush campaigns for Time magazine and who has spent a special two years inside the Reagan White House--attending high-level meetings, interviewing the Reagans and the "Reaganauts," and investigating the real stories behind this headline-making Administration's decisions, controversies, and shuffles.

GAMBLING WITH HISTORY is full of the kind of information and insights that make news and the kind of long-term news that makes history. Barrett offers hitherto unreported details
