Hurry Up, America. & Spit is the prescription that Pearl Bailey fans everywhere will understand and appreciate. Miss Bailey is fed up with the misuse of America's greatest resource: our people.

Pearl Bailey sees her fellow Americans plain. She herself is not an armchair philosopher. She wants to re-

discover active ways to support the ideals on which the United States of America was founded. She believes in encounters with the truth : in business, politics, and personal relations. She thinks we Americans deserve the truth.

Hurry Up, America. & Spit is a purgative. After reading these personal observations, the reader might want to rid himself of the civic "uglies," as Miss Bailey calls the dark events of our time. But Hurry Up is also a restorative. You will feel better, and more hopeful, if you read it and share it with someone you like.
