This book examines some crucial aspects of surveillance processes with a view to showing what constitutes them, why the growth of surveillance is accelerating and what is really at stake personally and politically. It scrutinizes individual surveillance systems - CCTV, biometrics, intelligent transportation systems, smart cards, on-line profiling - and discusses their implications for our future. Surveillance as Social Sorting is a fascinating contribution to a relatively new field - surveillance studies.

Lyon真的是疯狂快速出书但是完全没啥特别洞见全靠不停重复既往观点和他人研究的典范……论文集良莠不齐。
