This book provides sportbike riders with a clear and complete guide to fine-tuning their suspension systems for maximum performance, comfort and efficiency. The author and former roadracer Andrew Trevitt explains how to adjust a bike's suspension to suit each rider's individual preferences and style. Using rigorous testing, clear analysis, and easy-to-follow language, Trevitt now demystifies the art of suspension

tuning. Trevitt's analysis and suggestions are illustrated by detailed color photographs of the suspensions of sportbikes from Honda, Ducati, Suzuki and other top manufacturers, as well as charts, graphs and illustrations. He also includes tables for recording settings, lap times and other performance data at track sessions, as well as a troubleshooting guide listing common suspension problems and their likely solutions.
