《概率统计高级教程II统计学基础》是源亨和王通惠共同编著的。 • This is an update

Text book for beginning graduate students in Mathematics, Probability and Statistics, Engineering, Computer Sciences, Mathematical Economics

- It distinguishes from all existing texts on the subject from its pedagogical spirit, namely, motivations before mathematics; mathematics tools are only introduced when needed and motivated
- All theoretical results are proved in a friendly fashion
- Teaching the students, not only the concepts and possible applications, but also guiding the students with proof techniques
- This series will help students to learn with full understanding and appreciation of the subject
- It will provide interested students with solid background for research.
