著者:Donald de Carle

出版者:Skyhorse Publishing

出版时间:2008-09-08

装帧:Paperback

isbn:9781602393578

The absorbing and everlasting subject of watch repairing has been dealt with in books in many languages throughout the years. But when de Carle first set out to write Practical Watch Repairing in 1946, it was with the intention of creating a textbook "that a watchmaker can understand, even if he can't read." With over 550 instructional black-and-white illustrations and an approach that assumes no prior watch-repairing experience, this book achieves and surpasses that lofty mission, and has been touted as "the best illustrated book on practical horology" (Horological Journal) ever written. For the readers in his audience, de Carle has provided well-informed discourse on every topic a watchmaker, or aspiring watchmaker, needs to know. With Practical Watch Repairing, even a layman can become a watch-repair specialist.
