Toys is a journey through the world of toys and the children's rooms that were their home, from the late 19th century to the present day. Presented in settings built specially for the project, more than 500 toys from the renowned collection at the

Musée des Arts Décoratifs become actors in sketches that are alternately eerie and droll, disturbing and poetic. This dreamlike, evocative book will fascinate both children and toy specialists and collectors, as well as anyone still enchanted by the wonders of childhood.

Speaking, understanding, thinking as a child does not mean exercising inferior functions, enjoying gifts of lesser quality.
