In a small Pennsylvania town depressed by coal mine closings, a young man of 19 finds himself thrust into the role of parent. Harley has become the guardian of his three younger sisters as the result of their mother going to jail for the shooting death of their father. Each sibling finds his or her own way of coping with this family tragedy. During his regular visits with a psychotherapist Harley finds some comfort while at the same time feeling disdain for this woman. He is able to satisfy his youthful urges by beginning a series of sexual encounters with an older woman whose daughter is a playmate of his youngest sister. The characterizations are vivid, and each family member generates sympathy. Reader Dylan Baker does a satisfactory job of interpreting Harley's sense of frustration and cynicism. An absorbing novel worth purchasing for fiction collections.DCatherine Swenson, Norwich Univ. Lib., Northfield, VT
