When business consultant Jim Gammon's headless body is discovered in the dense vegetation of a remote corner of Hawaii, the police figure a bizarre accident. But when the retired business tycoon he had been visiting floats dead in his own swimming pool, the explanation of an unlikely "accident" linked with a more unlikely "suicide" strain the credulity of even the Hawaiian authorities.

At the heart of the intrigue is an ultra-conservative fund-raising organization that milks the rich for "philanthropic" causes.

After investigating the death of Jim, his brother Steve learns that both dead men had deep reservations about its founders. That's when Steve is discovered poking his nose into affairs that don't concern him.

Armed with incriminating dossiers, Steve is out to solve not only two murders but reveal how gullible millionaires have been duped all these years. But an ingenious scheme of sexual blackmail threatens to permanently silence him.

The suspense never falters in this rousing thriller as William Beechcroft reveals the inner workings of a secret Washington, confirming all our worst suspicions about greed and kick-backs that harbor frightening parallels to recent cases of Federal fraud, mismanagement and crime.
