You are holding in your hands perhaps the most important document to be published since 1215. Roger's Profanisaurus - The Magna Farta is a comprehensive survey of British bad language from the pages of Viz, the UK's most pant-pissingly funny magazine.

Now fully revised and updated to include 10,000 foul-mouthed definitions, it's a riot of political incorrectness gone mad that fully deserves to take pride of place on lavatory cisterns throughout the land.
