装帧:Paperback

isbn:9780803974876

Increasingly in the West, horror is experienced only through television and cinema screens. Tester looks at the moral possibilities and implications of this, and also addresses the pressing concern of whether or not this is a time of moral decay. He uses a wide range of literature to explore these questions and develops his account around debates raised by Arendt, Simmel, Riesman and Bauman.
