This book begins with a single premise: that Vermeer painted images not only of extraordinary beauty, but of extraordinary strangeness. To understand that strangeness, Bryan Jay Wolf turns to the history of early modernism and to ways of seeing that first developed in the 17th century. In a series of provocative readings, Wolf presents Vermeer in bracing new ways, arguing for the painter's immersion in - rather

than withdrawal from - the intellectual concerns of his day. The result is a Vermeer we have not seen before: a painter whose serene spaces and calm subjects incorporate within themselves, however obliquely, the world's troubles. Vermeer abandons what his predecessors had laboured so carefully to achieve: legible spaces, a world of moral clarity defined by the pressure of a hand against a table, or the scatter of light across a bare wall. Instead Vermeer complicated Dutch domestic art and invented what has puzzled and captivated his admirers ever since: the odd daubs of white pigment, scattered across the plane canvas; patches of blurred surface, contradicting the painting's illusionism without explanation; and the querulous silence that endows his women with secrets they dare not reveal. This illustrated book situates Vermeer in relation to his predecessors and contemporaries, and it demonstrates how powerfully he wrestled with questions of gender, class and representation. By rethinking Vermeer's achievement in relation to the early modern world that gave him birth, Wolf takes northern Renaissance and early modern studies in new directions.
