The calendar design is process-intensive, duplicating many favorite features from the book, including tipped on envelope and booklet.

In the early nineteenth century, an English gentleman embarked on a tour of the sites of ancient Greece. He brought with him "Mythology: Greek Gods, Heroes, and Monsters," a guide to Greek myths purportedly written by Lady Hestia Evans. "Mythology" is a recent addition to the best-selling Ology series of books and is the basis for this calendar, which features many of the same lavish illustrations, paper crafts, flaps, foldouts, and other surprises. It also includes a set of knowledge cards. This calendar is a mythical exploration fit for the gods.
