The Domain Book of Intuitive Home Design is the first book to identify four different kinds of people--the Visionary, the Artisan, the Idealist, and the Adventurer--and to explore how these types express themselves through aesthetic choices.

If you're an Idealist, you might be happiest in a sleek, contemporary home with all the latest conveniences. But if you're an Adventurer, your domestic bliss would more likely

be found in a lively dwelling that bursts with color and surprise. You might be a Visionary if you love fine antiques and classic proportions; if you're more interested in casual, comfortable furnishings and a great view of the outdoors, then you're probably an Artisan.

This book begins with a quiz to help you discover which personality archetype you most resemble. The next four chapters give an overall picture of each archetype, and explore the emotional underpinnings that lead to each type's decorating preferences.

Then, a room-by-room section brings those choices into beautiful focus. From real-life examples you will learn to create a home that is not only lovely to look at, but that also suits your true self. Shopping lists, mini-exercises, and guided visualizations will inspire, educate, and amuse you. Along the way you will recognize yourself, your friends, and your loved ones.

The Domain Book of Intuitive Home Design introduces a whole new way of thinking about decorating. Most important, it offers the language and the tools to understand and express your one-of-a-kind style.
