装帧:Hardcover

isbn:9781847733474

South-East Asia is one of the richest parts of the world in terms of reptiles.

This first comprehensive guide to the reptiles of this region covers all the reptiles recorded from mainland South-East Asia, from Thailand, Myanmar, Laos, Vietnam and Cambodia to Singapore and Peninsular Malaysia, as well as the islands of the Great Sundas (including Sumatra, Java, Borneo and Bali). A detailed account with key identification characteristics, habitat and behaviour is included for each species, from crocodiles, tortoises and turtles, to lizards and snakes. Every recognized species is described, and 74 magnificent specially commissioned colour plates by top wildlife artists depict 700 major species in meticulous detail. Where useful, details such as plastrons (for turtles and tortoises), juveniles, variants and head patterns are also shown on the plates.

毫无疑问这是一个先例，但他显然可以做的更好。爬行类鉴别这方面最核心的指标就是鳞，没有鳞式光靠一些概念性的图片来进行区分鉴别当然是不靠谱的。再者文字部分的内容也有不少值得推敲的地方。
