Learn how to use familiar Microsoft tools to build enterprise solutions that connect to SAP. Written by Microsoft developers with an in-depth knowledge of SAP systems, this book demonstrates how to use Microsoft Visual Studio®, Expression®, SharePoint® Products and Technologies, BizTalk® Server, SQL Server®, and other Microsoft tools to develop custom enterprise solutions using data and reports from the SAP

environment. One of the strengths of the SAP platform is that it adapts to the needs of individual enterprises. The alliance between Microsoft and SAP has opened up many ways for .NET developers to use familiar skills and tools to connect with and customize SAP applications.

评论

超过4个人合写的书必然是废品，如果作者们还是evangelist就更不行了，全书缺乏技术深度，也缺乏实战示例，都是些PPT的堆砌，SAP/MS微软合作历史的大事年表和产品列表。
