出版时间:2008-10-10

装帧:Paperback

isbn:9781890774486

This book is for C# developers who want to learn how to develop professional web applications with Microsoft's ASP.NET 3.5. The first 4 chapters present a quick-start

course that works both for beginners and for experienced web developers who are new to ASP.NET. Then, the next four sections present (1) the skills you need for any business application, (2) the skills you need for database applications, (3) the skills you need for e-commerce applications, and (4) the skills you need for developing code that can be reused in other web applications. Along the way, you'll learn about .NET 3.5 enhancements that streamline web development, like the ListView and DataPager controls, LINQ, and AJAX.
