isbn:9780545082136

Each spread will have either 1 or 2 full-color photographic puzzles with anywhere from 5 to 10 differences to spot in each. Each puzzle includes the number of differences to find, suggested length of time to finish the puzzle, and the page number where the answer can be found. The book will be organized into 4 chapters by season with increasing degrees of difficulty (easy, medium, and hard), and an answer key in the back. Life began publishing their back-page Picture Puzzle every Friday and received so many letters from readers asking for more, they decided to create a book full of brand-new puzzles. A larger trim size, simple design, and fewer puzzles per page will make it obvious that our version is for a younger audience.
