Georg Simmel's highly original take on the newly revived field of sociology succeeded in making the field far more sophisticated than it had been beforehand. He took insights from dialectical thought and Kantian epistemology to develop a 'form sociology' method that remains implicit in the field a century later. Forms include such patterns of interaction as inequality, secrecy, membership in multiple groups, organization size, and coalition formation. While today texts and professional societies are organized around 'contents' rather than 'forms', a fresh reading of Simmel's chapters on forms suggests original avenues of inquiry into each of the contents - family, business, religion, politics, labor relations, and leisure.

作者介绍:

Georg Simmel (1858-1918) earned the doctorate in Berlin (1881) and was widely recognized as an innovative contributor to philosophy, aesthetics, and social science, but as an academic outsider. He had a formative impact on sociology through his writings and students.

Anthony J. Blasi (Ph.D. Notre Dame), Professor of Sociology at Tennessee State University, has authored many works in the history of sociology, sociological theory, and the sociology of religion. His most recently edited volume is American Sociology of Religion: Histories.

Anton K. Jacobs (Ph.D. Notre Dame), Lecturer in philosophy at the Kansas City Art Institute, has published articles in the sociology of religion, the political imagination in literature, and urban history; currently writing a text in the philosophy of religion.

Mathew Kanjirathinkal (Ph.D. Notre Dame), Professor of Sociology at Park University, has published extensively in sociology, cultural studies, feminism, and postmodern politics; currently writing a book on postcolonial theory.

第一章 社会学的问题 概要：着重阐述齐美尔眼中社会学的研究对象与任务。
笔记：社会存在于若干个人有着相互影响的地方。这种相互影响总是产生于某些特定的本能欲望，或者为了某些特定的目的。……这些相互作用（人们之间的相互支持行为、共同行动等），从那些促成的本能欲望和...
