作者介绍:

Management Sciences for Health (MSH) is a nonprofit international health organization composed of nearly 1,300 people from more than 60 nations. Their mission is to save lives and improve the health of the world’s poorest and most vulnerable people by closing the gap between knowledge and action in public health. Together with our partners, we are helping managers and leaders in developing countries to create stronger management systems that improve health services for the greatest health impact.

Euro Health Group has worked in over 60 countries all over the world collaborating with policy makers, health care providers in public and private sectors, donors, NGOs, and with international organizations and development agencies. EHG has developed and consolidated a range of core competencies in the area of health.
