In The Fruits of Revolution Jean-Laurent Rosenthal investigates two central questions in French economic history: To what extent did institutions hold back agricultural development under the Old Regime, and did reforms carried out during the French Revolution significantly improve the structure of property rights in agriculture? Both questions have been the subject of much debate. Historians have touched on them in a number of local studies, yet usually they have been more concerned with community conflict than with economic development. Economists generally have researched the performance of the French economy without paying much attention to the impact of institutions on specific areas of the economy. This book attempts to utilize the best of both approaches: It focuses on broad questions of economic change, yet it is based on detailed archival investigations of the impact of property rights on water control.

通过农业史的角度来研究大革命的遗产真实非常新颖，也能够用于论证为什么在随后的复辟时期法国反而经历了稳定的经济增长和社会发展。顺带一提标题是“fruits”是因为这本书有三分之一真就在写普罗旺斯的葡萄园（以及各种农场）....还有三分之一在写诺曼底的农场，which is我来LH路上亲眼看到过的哈哈哈哈
