Not many people can claim to have invented a new science, but Aristotle invented two: zoology and logic. More than two millennia after his death, Aristotle's thought still influences us. Here, over coffee (a drink Aristotle never tasted), he converses with refreshing and illuminating simplicity about everything from causation and deduction

to the role of women and the wonders of the natural world in a pre-scientific age.

很快翻完， Barnes耍嘴皮子太萌了， 死冷的幽默感

可爱的哲学普及读物， 写得真好。
