Giigle is a warm-hearted, laugh-out-loud memoir about starting over. Touching and funny, it offers an insiders look at Google culture, thoughts about the benefits of massage on health and spirituality, zany globetrotting, high-flying antics, and encouragement for anyone who needs to begin anew.

作者介绍:

Bonnie Brown owned and operated a private school for ten years, taught high school English for four years, and graduated from the American Academy of Nutrition, specializing in counseling health issues. In 1998 Bonnie decided to focus on massage as her primary profession. Before long, Bonnie was the in-house massage therapist for Google, where she witnessed the impact of the power of touch. Needless to say, Bonnie's life was never the same; which was especially true on August 19, 2004, when Google went public. Bonnie is a life-long learner and entrepreneur. She admits she doesnt live the mountains of Colorado with a wonderful husband and two golden retrievers. She lives in Nevada and enjoys spending time traveling and hanging out with her two kids and four grandkids. She's also the president of a nonprofit

foundation that focuses on world-changing efforts for people in need.
