A survey of Spanish language literature from Spain and Latin America. This volume covers Spanish literature from the beginnings through modern times. Introductions to each literary period include discussions of the historical and cultural developments of each period and a brief history/overview of literature in the period. Also included is a brief bibliography for each author. Pedagogy includes questions to develop students' critical abilities, including a student guide to the identification of key literary techniques or literary components, and suggested essay questions such as a student could expect on a typical Advanced Placement* literature exam.
