In the Micronesian Islands, a top-secret, US government-sponsored undersea lab conducting vital biomedical research on a rare jellyfish known as the Blue Medusa suddenly disappears. At the same time, off Bermuda, a bathysphere is attacked by an underwater vehicle. Stranded half a mile below the surface, its passengers are left to die. Only Kurt Austin's heroic measures can now save them from a watery grave. Austin, suspecting a connection between the two mysterious events, puts the NUMA team on the case. He has no idea what he has just got them all into - a hideous series of medical experiments...an extraordinarily ambitious Chinese criminal organization...a secret new virus that threatens to set off a world-wide pandemic. Austin and NUMA have been in tight spots before, but this time it's not just their own skins they're trying to save - it's the lives of millions.
