Beautiful, magical, and fun, what kid can resist the adventure presented by a fairyland world in their own backyard? Approved by the Fairy Queen herself and backed by the Society to Keep Fairies Free (SKFF) and the secretive Fairy Fellowship Coalition (FFC), Professor Dalrymple's patented system has been teaching kids for over two centuries how to find and befriend their hidden fairy neighbors. As the most deluxe fairy catching system available, the kit includes 5 glistening glitter colors to attract fairies, a humane fairy cage, magnifying glass, fairy net, and 32-page fairy field guide.
