This is award-winning photojournalist Santi Visalli's tribute to his adopted home. Great monuments are freshly framed as the Empire State Building stands at attention against a crisp winter sky and the art deco detail of Rockefeller Center glows in gilded splendor. In a city famed for its neighborhoods, Visalli has provided fascinating glimpses of the diverse areas that comprise the dynamic whole. From architecture to

people, from sidewalk to skyline, Santi Visalli has documented in stunning color photographs the spirit and energy of New York as only he can.
