We owe a great debt to Jean Baptiste Marc Bourgery (1797-1849) for his "Atlas of Anatomy", which was not only a massive event in medical history, but also remains one of the most comprehensive and beautifully illustrated anatomical treatises ever

published in any language. In 1830, having received his doctorate in medicine three years prior, Bourgery began work on his magnificent atlas in cooperation with illustrator Nicolas Henri Jacob (1782-1871). The first volumes were published the following year, but completion of the treatise required nearly two decades of dedication. The four parts of Bourgery's treatise cover descriptive anatomy, surgical anatomy and techniques, general anatomy and embryology, and microscopic anatomy. Jacob's spectacular hand-colored, life-size lithographs are remarkable for their clarity, color, and aesthetic appeal, reflecting a combination of direct laboratory observation and illustrative research; the images are to this day unsurpassed in anatomical illustration.

在溜须拍马让母上大人帮忙讲解完之后，真的是觉得帅!爆!了!啊!
首先当然是画得好棒!真的是跪着看完的...
而且好细致，由骨头开始一点一点加上去，“拼”成了一个人!

还有对解剖器材和手法的描绘，哈哈，我都觉得可以当传家宝了。
PS.那看不懂的是法语吗...想学...

在某壳的公众号小店买了中文版，太过震撼。
