著者:Nicholas Joly

出版者:Wine Appreciation Guild

出版时间:2008-04-25

装帧:Paperback

isbn:9781934259023

French winemaker Joly explains how he uses the principles and practices of biodynamics to grow his grapes and make his Savennieres, which is "among most distinctive wines today" (Wine Spectator). Biodynamics was discovered, some say invented, by Rudolph Steiner, and involves electricity, rays, shapes, dung, and other aids overlooked by conventional and organic agriculture. No details are given for the French edition, but the English translation is by Matthew Barton.

## 评论

不實用也不具有指導性，雖然自然動力法本身就很玄乎，可這本空泛又沒有佐證的內容，還不如口耳相傳的一些說法。
