One of the best selling and most highly regarded volumes in the Blueprints series, Blueprints Pediatrics provides students with a concise review of what they need to know in their pediatrics rotation or the Boards. Each chapter is brief and includes pedagogical features such as bolded key words, tables, figures, and key points. A

question and answer section at the end of the book presents 100 board-format questions with complete rationales. This edition includes full-color dermatology and infectious disease photographs and multicolored flow diagrams of congenital heart defects. A companion Website includes a question bank and fully searchable text.
