A new direction is being created in the design and architecture of educational spaces. This full-color book showcases over 80 projects featuring the most creative and innovative projects done in the field of education. The programming, planning, and

design of educational facilities including public and private primary and secondary schools, colleges and universities, as well as libraries, corporate training facilities, convention centers, and daycare centers are featured. "Educational Environments, Number 4" illustrates how today's best educational projects are exceptionally functional, economical, energy conserving, and easily maintained, while at the same time being both adaptable and appealing. This volume is an invaluable planning and design resource for individuals who must preserve, enhance, and convey America's intellectual leaders.
