出版者:Cambridge University Press

出版时间:1989-11-24

装帧:Paperback

isbn:9780521389211

This book introduces the methodological and philosophical problems with which modern history of science is concerned, offering a comprehensive and critical review through description and evaluation of significant historiographical viewpoints. Incorporating discussion of key problems in general historical writing, with examples drawn from a range of disciplines, this non-elementary introduction bridges the gap between general history and history of science. Following a review of the early development of the history of science, the theory of history as applied to science history is introduced, examining the basic problems which this generates, including problems of periodisation, ideological functions, and the conflict between diachronical and anachronical historiography. Finally, the book considers the critical use, and analysis, of historical sources, and the possibility of the experiential reconstruction of history. Aimed primarily at students, the book's broad scope and integration of historical, philosophical and scientific matters will interest philosophers, sociologists and general historians, for whom there is no alternative introduction to the subject at this level.

## 评论

怎么都没人评，好书啊，好多人都觉得科学史从英美开始，事实上德国法国传统更早更重要。讲史学理论的地方没咋看，本身就没啥意思，后面讲科学史的几种路径都该细读。
