Whether you have a goldfish, dog, cat, or lizard, you and your pet reverberate with chi, the mystic flow of life. This is an illustrated book with a serious but entertaining overview of how we need to integrate our animals into our Feng Shui applications. Just like the elements of earth, air, fire, and water, animals are full of natural energy, innate or active, and they have a pervasive desire to be an emotional support to their humans. Our pets improve our health by curling up with us, perhaps protect our homes like sentries, and commiserate with us about work and love. By understanding the octagon of the "fur bagua," we integrate our pets' lives into the dynamic of our household, and all will live more harmoniously, whether furry, feathered, or scaly. This is the first book

to introduce animals into our Feng Shui.
