WHO IS ROBERT SMITH? TO HIS AMAZING ACHIEVEMENT ROBERT SMITH IS THE GREATEST ASTROPHYSICIST OFall time, whose fantastic exploits are unequalled for thought provoking theories, hair-raising inventions and bloodcurdling engineering. To his fans he is a superhuman brain of never ending knowledge and neural genius, whose life is dedicated to the betterment of mankind. This is Robert Smith-his legacy, his cathedral, his upside. Like all men of greatness Robert Smith has a downside. To his psychiatrist, Robert Smith is a classic nut, a fruitcake, the biggest loony this side of the galaxy. To the world at large he is a strange, withdrawn penny pinching miser whose complacency changes with the wind-the minute money enters into it-a streak of meanness wherever the almighty dollar is concerned. This too is Robert Smith-crazy man, skinflint, his downside.
