For decades The CQ Researcher reports have been a first stop for students researching school reports and learning about contemporary issues. The unsurpassed value in these objective and clearly written loose-leaf reports now is available in books built

around individual topics. Each volume reprints complete recent reports on these subjects. These modestly priced books will help your students understand current events and will save you time by providing single, circulating volumes on these important and often contentious topics. For years your students and library visitors have relied on The CQ Researcher for accurate and complete background information and analysis on timely topics. Now that value is conveniently packaged in single-issue books for research and circulation. In addition, each book in the series includes a How to Write a Research Paper appendix. This guide to writing a research paper will help students with all aspects of writing a paper -- from getting started, choosing a topic, gathering information from both the library and the Web, to writing and revising a final paper. CQ Researcher on Teens in America explores contemporary topics debated in schools and discussed around the family dinner table including drug testing, parental rights, school violence, getting into college, and juvenile crime.
